Inspection | Training | Audit | Consultancy

Quality, Health, Safety and Environmental Services

ABOUT US

ITAC - The International Training Academy and Consultancy is an organization providing professional training and consultancy on Occupational Health, Safety and Environment. It is founded by two well skilled individuals with more than 10 years of experience in the field of logistics, training and safety.

Our Vision

We are committed to be the partner of choice for individuals and organizations in the journey of excellence.

Our Mission

Offering high quality training and consulting services in the field of Industrial Health & Safety to our partners to help them excel in their careers and businesses through reducing the risks & losses adhered by safety issues through professional and innovative solutions.

ACCREDITATIONS

ISO Consultancy

ISO Consultancy

An ISO 9001 certification is much more than a paper certificate or the ability to “check a box” on a customer requirement. Its value is found in the improvements seen by your customers in how well you meet their needs, both spoken and unspoken needs

ISO 9001 Consultant

ISO 9001 is the International standard for Quality Management systems. It is the most widely used way of demonstrating to your customers, whether existing or potential, that you are committed to the quality of your product or service and have been assessed accordingly

ISO 14001 Consultant

ISO 14001 is an Environment Management System(EMS), which is a tool for managing the impact of an organisation’s activities on the environment. It takes a pro - active approach and allows business to consider environmental issues before they become a problem.

ISO 45001 Consultant

ISO 45001 is the future replacement to OHSAS 18001 and will become the international ISO standard for Occupational Health and Safety Management Systems (OHSMS). It Improves efficiency and consequently reduce accident and production time loss

IRCA Auditor Courses

IRCA Lead Auditor Courses

The International Register of Certified Auditors (IRCA) is an initiative started in 1984 by the British government to make business and industry more competitive by establishing principles and practices focused on quality. Today, it represents more than 10,000 certified auditors located in more than 120 countries. Our IRCA training courses benefit both professionals and organizations.

ISO 9001:2015 QMS Lead Auditor Course

Quality Management System - The course is aimed at equipping professionals with the knowledge and experience for conducting efficient and value-adding quality audits. It is designed to broaden the understanding of participants on QMS design and implementation. The 5 - day program focuses on key areas including Customer Satisfaction, Process Management, and Continual Improvement. It also delves into how critical issues can be integrated into the QMS of an organization.

ISO 14001:2015 EMS Lead Auditor Training Course

Environment Management System The course is structured to enable people to ably perform comprehensive and value - adding environment audits , while gaining deeper understanding of EMS design and implementation. The course focuses on areas such as aspect - impacts, objectives and targets, operational controls, management programs, conformity to the legislation and interrelationship of an organisation's management function to the policy.

IRCA Auditor Courses

ISO 45001 OHSAS Lead Auditor Training Course

Health & Safety Management System OHSAS lead auditor course is designed not only to help people perform capable and value-adding health and safety audits, but also to develop attendees wider understanding of health and safety management systems design and implementation. Particularly helps to the attendees on main subjects such as interrelating the management function of the organizations to the policy, hazards and risks, objectives & targets, management programs, operational controls and compliance to the legislation.

IRCA Internal Auditor Course

ITAC Safety provides Internal auditor training Courses customised to suit your needs. All International Management Standards require to conduct internal auditors training as per ISO 19011 standard requirements.

ISO Internal Auditor Training – Objectives

The purpose of this program is to provide training in the principles, concepts and requirements of the standards.

On Completion of the course the participants will be able to :

Understand the underlying philosophy and use principles, concepts and requirements of the ISO standards and how to apply them within and auditing context. Carry out internal audits, with confidence and as per the requirement of ISO 19011.

Other Courses
